

UROP Application Requirements:

Applicant information form

Enter the requested information via a form provided in the eSeaGrant system about the student if known at the time of application along with the faculty member's information. Please note: All applications must be initiated by a faculty member and submitted by a faculty member.

Narrative

Please submit no more than a three-page narrative describing your research proposal. The narrative description must include the following information:

Project Overview: Describe the proposed project and the scientific benefits that will likely result from its successful execution.

Background: What relevant information is known about the project area?

Project Objectives: Concisely state what you propose to accomplish with your project?

Project Hypotheses: What do you expect your project to demonstrate? Give both null and alternative hypotheses.

Project Methodology: Explain in a logical sequence how you will execute your research.

Project Benefits: What are the applications of your anticipated results? How will they advance our understanding of the field? What are the pure or applied implications of your research?

Role of the student: Clearly describe the role of the student in the research project.

Any proposal narrative that goes over the three-page limit will be disqualified. Please note: tables, graphs, budget and references are not part of the three-page limit and can be attached in the "additional document" section.

Budget and Budget Justification

A simple budget form is available in the eSeaGrant system to enter Student Labor Costs, Supplies, and Travel expenses. A Project Budget Justification document explaining each expense category is required and can be uploaded via eSeaGrant.
