

WORKSHEET FOR 2016-2018 RESEARCH STRATEGIES

1. Review the Goals and Strategies for the respective Focus Area you are assigned.
2. Rank Goals and Strategies within a Goal as to priority of how Sea Grant may contribute to science and management needs of coastal ecosystems and communities to meet our mission;
3. Suggest new Strategies within a Goal; or provide clarification to an existing Strategy to identify the potential impact of expected research results and knowledge that articulates the contribution of Sea Grant to science and management needs of coastal Louisiana.
4. Are there any particular OUTCOMES (IMPACTS) that your group would like to see Sea Grant achieve in the respective Focus Area your group is reviewing that may provide guidance to Outreach-Education-Research. For Example – using this OUTCOME you identify, Louisiana Sea Grant could work back from Extension activities to discovery needs that could be fulfilled by Research activities.
