

Life of a Scientist

Creative Writing:

Students may write poems (haiku, free verse, sonnets, etc.) about life of a scientist from their perspective (whether it's reference to the video or if they were a scientist).

Creative Drawing:

Students may draw a picture depicting their dream life as a scientist.

Here are some questions that the students can think about to help them with this prompt.

Questions to ask yourself:

- What would you do if you were a scientist?
- What are some things you would want to see or do?
- What would your research focus on?
- What have you taken from the video?
- What kind of scientists were featured in this video?
- What kind of scientist would you want to be?
- How would your work change the world?
